

ENERGIZER Z14 / Z18

The JVA Energizer are top of the range energizers meeting all requirements from basic home security fence to fully integrated high-profile installations. These energizers have LCD displays showing out & return voltages, battery condition as well as fence programming settings.

The units are fully compatible with the Z-range keypad & when wired to a keypad they are fully programmable. the energizers can be networked with other Z-Range energizers synchronizing their pulses ensures that they become a multi-zone group in order to accommodate larger sites where many zones are required. these energizers can be controlled via a PC or up to 3 individual keypads or you have the option of 1 PC that can control up to 14 Z-Range energizers

- Internal battery back-up ensures safety even when there is a power failure
- Can provide up to 24hour monitoring even in power failure
- Supplied with key Switch Operation
- Programable to standard or Bi-polar
- Built In Lightning & Surge Protection
- Anti-tamper programable (optional)
- Includes earth wire monitoring which sets off an alarm in case of tampering
- High-voltage Single Zone fence monitor triggers alarm when live wired are tampered with
- Dynamic Voltage Monitoring ensures the minimization of arching or false alarms while maximizing power and battery life
- Keypad compatible – only compatible with Z-Range
